

IISE University Partner Overview

About IISE

IISE is the world's largest professional society dedicated solely to the support of the industrial and systems engineering profession and individuals involved with improving productivity, efficiency and quality. Founded in 1948, IISE is an international, non-profit association that provides leadership for the application, education, training, research, and development of industrial and systems engineering.

With a global community and more than 250 chapters in over 90 countries worldwide, IISE's primary mission is to meet the ever-changing needs of its membership and profession, which includes undergraduate and graduate students, entry-level engineers, engineering practitioners and consultants in all industries, engineering leaders, and engineers in education, research, and government. Our primary mission is to advance our profession through educational efforts. To that objective, we match experienced professionals with organizations to teach, coach, and mentor their efforts in applying all aspects of industrial and systems engineering.

Headquartered in Atlanta, Georgia, IISE has the infrastructure to deliver superior service to its customers. The staff of twenty-five includes professionals specializing in engineering, training, business development, publications development, conference management, information technology and overall association management. IISE's corporate customers and individual clients are highly satisfied, as evidenced by the continuing growth of the Institute's key business units.

IISE Member Benefit Highlights

Professional Development

- IISE Annual Conference & Expo
- Society for Health Systems Conference & Expo
- Applied Ergonomics Conference & Expo
- Engineering Lean and Six Sigma
- Topical events
- Seminars
- Webinars

5. On-Site Corporate Training Benefits

As an IISE Partner, your organization qualifies for on-site training at significantly improved rates. Larger class sizes can be accommodated with savings ranging up to 50% off standard training rates (course & group size dependent). The results are outstanding professional learning and development opportunities

for your team at the best value. For a partial list of the courses available, visit our Training Center site at <http://www.IISEnet2.org/IISETrainingCenter/Default.aspx>.

6. Recruiting Solutions – Finding the Best Talent

IISE is recognized as having the largest and strongest IE talent pool available and offers on-line, digital and print solutions that ensure you locate the best talent quickly. As a, IISE partner, your company can access both on-line and print advertising at 40% less than standard rates.

7. Virtual Career Fairs

Interact directly with potential candidates at these special events each year. All included as part of your partner benefits!

8. Exhibit Booths at IISE Events

Attend IISE events and meet face to face with strong candidates. IISE and SHS partners get the best rate available with a 20% discount on all exhibit booths

9. IISE Solutions - Consulting Services:

As an IISE Partner, your organization will receive preferred rates and priority scheduling for IISE Solutions consulting services. In today's highly competitive marketplace, organizations require the most efficient processes to ensure the best productivity and the highest level of quality. IISE Solutions provides the support needed to help your organization achieve those goals using industrial and systems engineering and continuous improvement methodologies.

Methodology & Program Structure

IISE seminars are taught by practicing professionals who share their experiences with seminar participants. Each instructor brings years of practical business applications of the seminar topics. Courses involve numerous simulations, exercises, and projects which may involve mentoring and coaching to ensure significant and meaningful business results are achieved. Because our instructors have worked in a variety of different businesses and bring that expertise to every seminar and training program all training solutions can be tailored to your specific business application.

The courses can be provided either as straight "off the shelf," tailored to highlight the organization's business, or customized to meet specific training needs. As part of customization, courses can be built brand new or by combining elements of existing courses. IISE's continuing education staff works with clients prior to the delivery of the course to assure that it meets the stated objectives.

IISE's Six Sigma Black Belt course has been evaluated and recommended for graduate semester credits by the [American Council on Education](#). Participants can earn up to six semester hours in graduate credit based on the discretion of each college or university. ACE recommends that the IIE course is equivalent to three semester hours in statistics for quality assurance and three hours in statistical process or design of experiments.

Support for Corporate Partners

As part of the IISE Corporate Partner Program, IISE establishes a single point of contact to help provide easy and timely access for on-going support needs. Regardless of the need, IISE provides access to corporate staff to ensure the highest level of service is provided and management of the program is straight forward and low maintenance for our Corporate Partners.
